CRITICAL RULES FOR THIS BASE

Aturan Penting untuk Base Ini

! **GUM REBALANCED FOR SLIME — xanthan dropped 4g → 2g (xanthan causes slimy mouthfeel), guar raised to 5g + CMC to 4g. Same total 11g, same thickening, but clean creamy texture instead of slimy. Flavour + sweetness unchanged. / Gum diseimbangkan — xanthan dikurangi karena bikin tekstur berlendir.**

! **CARAMELISED SUGAR IS LESS SWEET — caramelising costs ~35% sweetness. That is why we use caramelised white sugar for FLAVOUR and plain white sugar + palm sugar for actual SWEETNESS. Both are needed. / Gula yang dikaramelisasi kurang manis ~35%.**

! **WHISK 2-3 MIN MAX — no acid means gums hydrate fast. Set a timer. Over-whisking = unchurnable. / KOCOK MAKS 2-3 MENIT — set timer.**

! **DO NOT STRAIN browned butter — brown bits are the Maillard flavour. Pour everything in. / JANGAN SARING mentega cokelat.**

! **BASE MUST TASTE ALMOST TOO SWEET ALONE — cold + 4x dilution masks sweetness. Do the 4x test before ageing. / Base harus terasa hampir terlalu manis sendiri.**

CARAMEL ICE CREAM BASE · actual 1254g batch

Es Krim Karamel Base · batch 1254g sesungguhnya

Scoop: **75g** | Portions: **~17** | Churn: **20–25 min** | Age: **8–12 hrs** | Store: **-18°C** | Sugar/shake: **~30g**

FOUR CARAMEL BUILDERS (replaces condensed milk)
1. **Dry caramel — white sugar** (true caramel)
2. **Browned butter** (nutty)
3. **Caramelised milk powder** (toasted-malty)
4. **Palm sugar** (earthy molasses + cookie bridge)

INGREDIENTS · BAHAN · 1254g batch

STABILISERS + EMULSIFIER	
Xanthan gum ↓ less slime	2g
Guar gum ↑ creamy	5g

Milk powder — base	60g
FLAVOUR · RASA	
Vanilla paste	20g
Fine salt	2g
TOTAL	**~1254g ✓**

The sweetness lesson: caramelised sugar tastes ~35% less sweet than plain. Cold + 4x dilution masks it further. So three sugar jobs: caramelised white = flavour, plain white = pure sweetness, palm sugar = molasses depth + sweetness.
Gula karamel ~35% kurang manis. Tiga peran gula: karamel = rasa, putih polos = manis, palm = molasses + manis.

PRODUCTION STEPS · LANGKAH PRODUKSI

1 — DRY CARAMEL·Karamel Kering
ALL 90g white sugar in light pan, medium heat. Do not stir at first — let melt. Swirl gently. Cook to deep amber (honey/copper). Amber to burnt takes seconds. / 90g gula putih di wajan, jangan diaduk dulu, masak sampai amber.

2 — DEGLAZE — CAREFUL, SPITS ⚠·Deglaze
Warm ~150ml of the milk. Off heat, pour warm milk slowly into amber caramel — IT SPITS. Stand back. Return to low heat, stir until dissolved into smooth caramel milk. / Tuang susu hangat perlahan ke karamel — MEMERCIK. Aduk sampai larut.

3 — DISSOLVE PLAIN SUGAR·Larutkan Gula Polos
Stir 120g plain white sugar into the warm caramel milk until fully dissolved. This is your sweetness layer. / Larutkan 120g gula putih polos ke caramel milk hangat.

4 — PRE-MIX GUMS·Campur Gum
Whisk xanthan (2g) + guar (5g) + CMC (4g) into maltodextrin + lecithin + 1 tbsp glucose. Zero dry clumps. / Kocok xanthan (2g) + guar (5g) + CMC (4g) ke maltodextrin + lesitin.

5 — WARM MILK BASE — 2-3 MIN ONLY ⚠
Warm remaining ~375ml milk to 55–60°C. Pour gum mix in, whisk high. SET TIMER, stop at 2 min 30 sec. / Panaskan sisa susu, kocok gum maks 2 menit 30 detik.

6 — COMBINE + SYRUPS·Gabung + Sirup
Add caramel-sugar milk, palm sugar (200g), remaining glucose, fructose. Stir until palm sugar dissolved. / Tambah caramel milk, palm sugar, glukosa, fruktosa.

7 — BROWN BUTTER + 20g MP — DO NOT STRAIN ⚠
Melt 50g butter, add 20g milk powder when foaming, stir to amber. Pour everything incl brown bits into base. Hand blend 2 min. / Cokelatin mentega + 20g susu bubuk. Tuang semua, JANGAN DISARING.

8 — ADD 60g MILK POWDER·Tambah Susu Bubuk
While warm 55–60°C, whisk in 60g milk powder until dissolved, no lumps. / Saat hangat, kocok 60g susu bubuk sampai larut.

9 — COOL THEN VANILLA + SALT·Dinginkan
Below 45°C, add 20g vanilla + 2g salt. Blend 30 sec. Should taste almost too sweet + caramel, nutty. / Di bawah 45°C, tambah vanila + garam.

10 — 4x DILUTION TEST ⚠·Tes Dilusi
1 tbsp base + 4 tbsp cold milk. Taste. Caramel forward, nutty, properly sweet = correct. If bland +30g plain sugar. / 1 sdm base + 4 sdm susu. Cicipi sebelum age.

11 — AGE 8–12 HRS — SET ALARM ⚠
Label make time + use-by. Max 16 hrs. Caramel + palm sugar deepen overnight. / Label jam buat + pakai. Maks 16 jam.

12 — CHURN + FREEZE·Putar + Bekukan
BQ12T 20–25 min. ORANGE container. Freeze -18°C min 4 hrs. Pull 3–5 min before scooping. / BQ12T 20–25 menit. Wadah ORANYE.

NO condensed milk: milk powder (80g total) + maltodextrin (40g) replace the milk solids and body the condensed milk used to give. Caramel flavour now comes from real dry caramel + browned butter + caramelised milk powder.
TANPA SKM: susu bubuk + maltodextrin menggantikan milk solids.

Optional silky upgrade: swap 50ml of the milk for 50ml whipping cream — fat coats the tongue and removes any last trace of gum slime. / Opsional: ganti 50ml susu dengan 50ml krim untuk tekstur lebih silky.
